Mobile App User Stories

6.5.1 Authentication & User Account – User Stories

User Story 1: Mobile Number Login with OTP

As a user, I want to log in using my mobile number and OTP, so that I can access the app securely without remembering passwords.

Acceptance Criteria

- User enters mobile number on login screen.
- System validates mobile number format (10 digits).
- OTP is sent via SMS based on registered preference.
- User enters OTP:
    - If OTP is correct → login successful.
    - If OTP is invalid → user sees “Invalid OTP” message.
- System allows:
    - Retry option (Resend OTP).
- Successful login creates a secure session for the user.
- User is redirected to app home after login.

User Story 2: New User Registration

As a new user, I want to register by providing my personal and professional details, so that I can create an account and begin using the app.

Acceptance Criteria

- Registration screen captures:
  - Full Name (mandatory)
  - Email Address (mandatory)
  - Mobile Number (mandatory)
  - Address (mandatory)
  - User Type selection (Painter, Contractor, Salesperson)
- User verifies mobile number through OTP before completing registration.
- Email format validation.
- Mobile number uniqueness enforced (cannot register two accounts with same number).
- User cannot proceed until all mandatory fields are completed.
- System stores registration details in backend.
- Upon successful registration:
  - User receives welcome message (SMS/Email)
  - User is auto-logged in or redirected to login screen depending on workflow.

User Story 3: Secure Session Management (Mobile App)

As an User, I want my session to be securely maintained after login, so that my account remains protected and my personal information stays safe during app usage.

Acceptance Criteria

- A secure session token is generated after successful login via OTP.
- Session persists as long as the user is active on the app.
- Session expires automatically after a period of inactivity.
- Upon session expiry:

    - User is automatically logged out.
    - User is redirected to the login screen.
- App prevents access to protected screens (e.g., Orders, Profile, Wallet, Catalog) without a valid session.
- Multiple sessions on separate devices can be restricted:
    - If enabled, logging in on a new device invalidates the older session.
- Logout immediately invalidates the active session token.
- Token refresh mechanisms (if implemented) must follow security standards for mobile apps

User Story 4: Session Management & Auto-Logout

As a user, I want the app to automatically log me out after a period of inactivity, so that my account remains secure if I forget to close the app.

Acceptance Criteria

- Secure session token is created at login.
- Auto-logout triggered after defined inactivity duration (configurable).
- After logout:
    - User is redirected to login screen.
- Session is invalidated:
    - On logout
    - On token expiry
    - On switching accounts
- App prevents access to authenticated screens without an active session.

6.5.2 Home Page

User Story 1: View Hero Banner Slider

As a user, I want to see promotional banners on the home page, so that I can stay updated on offers, new products, and important announcements.

Acceptance Criteria

- A hero banner slider appears at the top of the home page.
- Banners auto-rotate with configurable timing.
- User can manually swipe to move between banners.
- Each banner supports:
    - Image
    - Title & description text (optional)
    - Redirect link (e.g., category, product, offer page)
- Banners are fetched dynamically from backend.
- If no banners available → show a fallback placeholder.
- Banner images are responsive to different screen sizes.

User Story 2: View Categories

As a user, I want to browse product categories in a clean horizontal carousel, so that I can quickly navigate to the type of products I'm interested in.

Acceptance Criteria

- A **"Categories" section** is displayed on the home page below the banner slider.
- Categories are shown with:
    - Category icon (centered)

    - Category name (displayed below the icon)
- Category cards scroll **horizontally** with smooth swipe behavior.
- Tapping a category opens the corresponding **Product Listing Page (PLP)**.
- Categories are fetched dynamically from backend, including:
    - Category ID
    - Name
    - Display icon/image
- UI behavior:
    - Active touch ripple on tap
    - Proper spacing between cards

User Story 3: View Popular Products Grid

As a user, I want to see a list of popular or recommended products on the home page, so that I can easily discover trending items.

Acceptance Criteria

- Popular/recommended products displayed in a 2-column grid.
- Each product card includes:
    - Product Image
    - Name
    - Selling Price
    - MRP (if needed)
- Clicking a product card → opens the Product Detail Page (PDP).
- Products dynamically loaded from backend based on:
    - Recommendation logic
- Grid supports infinite scroll / pagination.
- If no products available → show empty state message.

User Story 4: Access My Profile

As a user, I want to quickly access my profile from the home page, so that I can manage my personal details, addresses, and settings etc.

Acceptance Criteria

- A profile icon is available on the top-right corner of the home page.
- Clicking the icon redirects to the Profile screen.
- Icon is always visible regardless of content scroll.

User Story 5: Language Selection Toggle

As a user, I want to switch the app language from the home page, so that I can use the app in the language I am most comfortable with.

Acceptance Criteria

- A Language toggle/button is available on the home page.
- Supported languages fetched from backend (e.g., English, Hindi).
- On selecting a language:
    - App content updates instantly.
    - User preference is saved in local storage + backend.
- Language persists after logout or app restart.
- If translation for any content is missing:
    - Show default fallback language (usually English).

User Story 6: Access Wishlist from Home Page

As a user, I want to access my wishlist from the home page, so that I can quickly view or manage products I've saved for later.

Acceptance Criteria

- A **wishlist icon** is displayed on the home page header (top-right next to profile icon).
- Tapping the wishlist icon redirects the user to the **Wishlist screen**.
- Wishlist screen displays:
    - Saved products with image, name, price, and discount.
    - Options to remove items or move to cart.
- If wishlist is empty:
    - Show empty state: **"Your wishlist is empty."**

6.5.3 Referral Points & Rewards

User Story 1: View Total Earned Referral Points

As a user, I want to view my total earned points , so that I can clearly track how many points I've collected from referrals and my own orders.

Acceptance Criteria

- A **Total Earned Points** section is displayed in the Account page by clicking the "My points" .
- Points include earnings from:
    - Successful referral sign-ups
    - Referral order completions
    - My personal order activity
- Points are fetched in real-time from backend.
- If the user has zero points:
    - Show message: **"0"**
- Points update instantly when new points are credited.
- Points remain available for redemption during checkout.
- Display components match the UI:

    - Total Points Balance
    - Points Worth (₹ value)
    - Redeem Limit
    - Total Redeemed
- Points remain available for redemption during checkout if minimum conditions are met .

User Story 2: View Referral Code & Share Options

As a user, I want to view and share my unique referral code, so that I can easily invite others and earn reward points.

Acceptance Criteria

- User can access the **Refer** screen by tapping **Refer.**
- The user's **unique referral code** is displayed in a highlighted box at the top.
- Below the referral code, a **"Share Referral Link"** button is available.
- On tapping the button, the system opens the device's share sheet with options like:
    - WhatsApp
    - SMS
    - Other native sharing options
- Shared link includes:
    - Referral code
    - App download link
    - User's unique referral parameter
- If code fails to load:
    - Show fallback message: **"Unable to load referral code. Please try again."**

User Story 3: View How Referral Program Works

As a user, I want to understand clearly how the referral program works, so I know how I can earn points.

Acceptance Criteria

- Section titled **"How it Works"** is displayed below the Share Referral Link button.
- Steps represented in numbered format like:
  - Share your referral code
  - Invitee signs up and chooses their user type
  - Earn points per signup + per order placed
  - Redeem points on paint purchases

User Story 4: View Referred Users List

As a user, I want to see all the people I've referred, so I can track who signed up and who completed an order.

Acceptance Criteria

- Section titled **"Your Referrals"** is displayed.
- Each referral entry card includes:
  - Referral user name
  - Time reference (e.g., "2 days ago", "1 week ago")
  - Event type (Sign Up / Order)
  - Status tag (Completed / Pending)
- If there are no referrals:
  - Show **placeholder empty state**.

User Story 5: View Reward Redemption Rules

As a user, I want to clearly see the redemption rules, so I know when and how I can use my points.

Acceptance Criteria

- Section titled **"Redemption Rules"** is displayed at the bottom of the Referral Program screen.
- Rules shown in bullet format as per UI:
    - Minimum ₹500 balance required to redeem
    - Maximum ₹5000 redeemable per order
    - Points expire after 12 months of inactivity
- Rules are fetched from backend so Admin can update them anytime.

User Story 6: View Points History

As a user, I want to see a detailed history of how I earned or redeemed points, so that I can track all transactions clearly.

Acceptance Criteria

- Section titled **"Points History"** is visible under the My Points section.
- Each history card includes:
    - Event title (e.g., "Referral Signup", "Order Paint", "Redeemed")
    - Date of transaction
    - Description (e.g., "Friend signup", "Order #1234")
    - Points earned or redeemed
    - Badge: "Credited" or "Redeemed"
- History list loads with pagination or infinite scroll.
- If no history:
    - Show empty state: **"No points history available."**

- Real-time updates after:
    - Points earned
    - Points redeemed
    - Referral signup
    - Referral completed order

6.5.5 Product Listing Page (PLP)

User Story 1: View Product Listing

As a user, I want to view all products in a scrollable list, so that I can browse items easily and find what I need.

Acceptance Criteria

- PLP displays a vertically scrollable product list.
- Each product card shows:
    - Product thumbnail image
    - Product name
    - MRP Price
    - Selling Price
    - Discount % (if applicable)
- Users can tap any product card → redirected to Product Detail Page (PDP).
- If product is out of stock:
    - Show **"Out of Stock"** badge or disabled state.
- Infinite scroll or pagination supported.
- If no products match → show empty state:
  "No products found."

User Story 2: Filter Products

As a user, I want to filter products based on relevant attributes, so that I can narrow down the list to what I'm looking for.

Acceptance Criteria

- A **Filters** button is available on PLP.
- Users can apply filters based on:
  - Category
  - Shade / Color
  - Pack Size / Variant
  - Price Range (slider or min-max input)
- Selected filters appear as chips/tags at the top of the list (optional).
- User can clear:
  - Individual filters
  - All filters at once
- Product list updates instantly after filter selection.
- If filters result in zero items → show empty results message.

User Story 3: Sort Products

As a user, I want to sort products based on pricing, discount, or new arrivals, so that I can view products in my preferred order.

Acceptance Criteria

- A **Sort** button is available on PLP.
- Sorting options include:
  - Price: Low to High
  - Price: High to Low
  - Discount: High to Low

    - Newest / Recently Added
- Selected sort option highlights as active.
- Product list refreshes instantly based on selected sorting.
- Default sorting logic configurable from backend.
- Sorting persists until user changes it or resets filters.

User Story 4: Navigate to Product Detail Page (PDP)

As a user, I want to tap a product from the list and see full details, so that I can evaluate the product before purchasing.

Acceptance Criteria

- Clicking a product card opens its PDP.
- Navigation should be smooth and state-preserving:
    - When returning to PLP, scroll position remains intact.
- PDP receives product ID and retrieves full information from backend.

User Story 6: Maintain Applied Filters & Sorting on Back Navigation

As a user, I want my applied filters and sorting to remain when I return from PDP to PLP, so that I don't lose my browsing context.

Acceptance Criteria

- System remembers:
    - Active filters
    - Active sort option
    - Scroll position

- On back navigation, user returns to the same point in the list.
- Users can continue browsing seamlessly.

6.5.6 Product Detail Page (PDP) – User Stories

User Story 1: View Product Images & Gallery

As a user, I want to view multiple product images in a slider, so that I can inspect the product before making a purchase.

Acceptance Criteria

- PDP displays a **carousel slider** with multiple images.
- Users can:
  - Swipe left/right
  - Tap navigation arrows
- Image counter shown (e.g., **1/4**).
- Images can be tapped to open **full-screen zoom view**.
- If only one image is available, slider controls are hidden.
- If images fail to load, show fallback placeholder.

User Story 2: View Product Pricing Details

As a user, I want to clearly see both MRP and Selling Price, so I can understand the discount offered.

Acceptance Criteria

- Product Selling Price displayed prominently in bold.
- MRP shown with strikethrough styling.
- Discount percentage displayed (e.g., **38% OFF**) as per UI.
- Price values are fetched from backend.
- If discount is not applicable, discount badge is removed.

User Story 3: Select Pack Size / Variant

As a user, I want to switch between different pack sizes or variants, so that I can choose the version that best suits my needs.

Acceptance Criteria

- Pack sizes are shown as selectable buttons (1L, 5L, 10L, 20L).
- Selected variant is highlighted as active.
- Selecting a variant updates:
  - Price
- If a variant is unavailable:
  - Show disabled state or “Out of Stock”

User Story 4: Check Delivery Availability by Pincode

As a user, I want to check if delivery is available to my location by entering my pincode, so that I know if I can order the product.

Acceptance Criteria

- Pincode input field and **Check** button displayed on PDP.
- User enters a 6-digit pincode.
- System validates format.
- Backend checks warehouse coverage mapping.
- Results displayed:
  - **Delivery Available** → success message
  - If pincode not mapped:
    - PDP shows “Service not available in this area”.

User Story 5: Manage Wishlist From PDP

As a user, I want to add or remove the product from my wishlist from the PDP, so that I can save items for later.

Acceptance Criteria

- Wishlist icon appears at the top right of PDP (♥).
- Wishlist syncs with backend in real-time.

User Story 6: Add Product to Cart

As a user, I want to add a product with a selected variant and quantity to my cart, so that I can proceed with purchasing.

Acceptance Criteria

- "Add to Cart" button visible at bottom.
- On tapping:
    - Product + variant + quantity added to cart.
    - Show confirmation toast (e.g., "Added to Cart").
- If product is out of stock:
    - Disable Add to Cart.

6.6.6 Cart Management – User Stories

User Story 1: View Shopping Cart

As a user, I want to view all the products added to my cart, so that I can review my selections before checkout.

Acceptance Criteria

- Cart screen displays a list of all added products.

- Each product entry shows:
    - Thumbnail image
    - Product name
    - Variant (e.g., 10L, 20L)
    - Selling price
    - Quantity selector (+ / – buttons)
    - Remove (×) icon
- Subtotal updates automatically based on quantity changes.
- If cart is empty → show empty state:
  "Your cart is empty."
- Cart scrolls vertically for long lists.

User Story 3: Update Quantity in Cart

As a user, I want to increase or decrease the quantity of items in my cart, so that the cart reflects my purchase needs.

Acceptance Criteria

- "+" button increases quantity by 1.
- "–" button decreases quantity (minimum = 1).
- If stock limit is reached:
    - Show message: **"Maximum available quantity reached."**
- Price updates automatically based on new quantity.
- If quantity becomes 0 (if allowed):
    - Product is removed from cart (optional rule).

User Story 4: Remove Product from Cart

As a user, I want to remove unwanted products from the cart, so that only the items I want to purchase remain.

Acceptance Criteria

- User can tap the × icon to remove an item.
- Confirmation popup.
- Cart updates instantly after removal.
- If all products are removed:
    - Display empty cart state.

User Story 5: Persist Cart State

As a user, I want my cart to remain saved even if I close the app, so that I don't lose my selected items.

Acceptance Criteria

- Cart persists in backend or local storage until:
    - User manually removes items
    - User places an order
    - Item becomes unavailable (then cart shows "Unavailable" badge)
- Cart is loaded instantly on app restart.
- Cart syncs across devices if user is logged in.

User Story 6: Proceed to Checkout

As a user, I want to proceed from cart to the checkout flow, so that I can complete my purchase.

Acceptance Criteria

- "Proceed to Checkout" button available at bottom.
- On tap:
    - App validates that cart is not empty.
    - App checks stock availability for each item.
    - User is redirected to the **Address / Delivery Selection** screen

User Story 7: Continue Shopping

As a user, I want an option to continue browsing products from my cart, so that I can add more items before checking out.

Acceptance Criteria

- "Continue Shopping" button displayed at bottom.
- On tap:
  - User is redirected back to the Home Page or PLP (configurable).
- Cart state remains intact.

6.5.7 Checkout & Payment – User Stories

User Story 1: Select Delivery Address

As a user, I want to select a saved delivery address during checkout, so that my order is delivered to the correct location.

Acceptance Criteria

- Checkout screen shows an **Address** step with all saved addresses listed.
- Each address card displays:
  - Recipient name
  - Address line(s)
  - Pincode
  - Phone number
  - Address tag (Home/Office/Other)
- User can select one address using a **radio button** style selection.
- Only one address can be selected at a time.

- A visible **"+ Add New Address"** button allows adding a new address.
- If no address is selected:
    - Continue button remains disabled or shows validation:
      "Please select a delivery address."
- Selected address is highlighted and passed to the Payment step.
- If an address becomes invalid (e.g., service not available for that pincode):
    - System shows validation: **"Delivery not available to this address."**

User Story 2: View Checkout Summary

As a user, I want to view a complete summary of my cart items during checkout, so that I can confirm product details before making the payment.

Acceptance Criteria

- Checkout screen displays:
    - Product name
    - Variant (e.g., 1L, 10L, 20L)
    - Quantity
    - Price summary
- Subtotal is calculated based on selected items.
- If any item goes out of stock during checkout:
    - Show alert: **"Item out of stock, please update your cart."**
    - Prevent payment until updated.

User Story 2: Automatic Shipping Charge Calculation

As a user, I want shipping charges to be calculated automatically based on weight slabs, so that I can see the accurate delivery cost before payment.

Acceptance Criteria

Backend slab configuration:

Weight Slab	Shipping Charge
0–10 kg	₹100
11–15 kg	₹50
16+ kg	₹0

- System reads total cart weight.
- Applies correct slab automatically.

User Story 3: Minimum Payment Amount Calculation (Final Logic)

As a user, I want the minimum payable amount to be calculated accurately based on total order weight, so I know the least amount I must pay to place the order.

Acceptance Criteria

Rule 1 — Base Range (≤ 100 kg)

- If order weight ≤ 100 kg → Minimum Amount = ₹100

Rule 2 — Above Base Range (>100 kg)

- Extra Weight = Order Weight − 100
- Extra Charge = Extra Weight × ₹3
- Minimum Amount = ₹100 + Extra Charge

Examples:

- **80 kg → ₹100**
- **100 kg → ₹100**

- **120 kg → ₹160** (100 + 20×3)
- Minimum amount appears clearly:
  "Minimum Payable: ₹XYZ"

User Story 4: Select Minimum Payment or Full Payment

As a user, I want to choose between minimum payment and full payment, so that I have flexibility at checkout.

Acceptance Criteria

- Two options visible:
  - **Pay Minimum Amount**
  - **Pay Full Amount**
- When user selects:
  - System updates payable amount.
  - Shows clear breakdown (subtotal, shipping, applied points, etc.).
- If minimum amount is selected:
  - Remaining balance is shown in order details.
- If full payment is selected:
  - Order total must be paid upfront.

User Story 5: Apply Referral Points

As a user, I want to redeem my earned referral points during checkout, so I can reduce my payable amount.

Acceptance Criteria

- "Apply Points" option visible during checkout.

- System fetches:
    - Available points
    - Redeemable limit (based on rules)
- Rules include:
    - Minimum redeemable = ₹500
    - Maximum redeemable per order = ₹5000
    - Points cannot exceed payable amount
- Applying points updates:
    - Payable amount
    - Remaining points
- Removing points resets the values.
- If user selects, “Minimum Payment” then referral should apply on pending payble amount not on minimum payment
- If Order has any eligible coupon, then referral point should apply on final amount

User Story 6: Apply Promo Code / Coupon

As a user, I want to apply valid promo codes or coupons during checkout, so I can get additional discounts.

Acceptance Criteria

- Input field available: **“Apply Coupon Code”**
- System validates:
    - Coupon validity date
    - User eligibility
    - Product/category applicability
    - Minimum order requirements
- If valid:
    - Discount applied

    - Payable amount updated
- If invalid:
    - Show error: **“Invalid or expired coupon.”**
- User can remove coupon.

User Story 7: Complete Payment & Order Confirmation

As a user, I want to complete my payment and receive confirmation, so that I know my order has been placed successfully.

Acceptance Criteria

- On successful payment:
    - Show **Order Confirmation Screen**
    - Generate order ID
    - Save payment type (Minimum / Full)
    - Save transaction ID
    - Trigger backend events:
        - Inventory lock
        - Order routing based on pincode
- If payment fails:
    - Order is not created
    - User stays on checkout
    - Show: **“Payment Failed. Please try again.”**

User Story 8: Checkout Validation

As a user, I want the system to validate all required information before placing the order, so my checkout is error-free.

Acceptance Criteria

System checks:

- Delivery address selected
- Stock availability
- Weight and charge calculations
- Coupon applicability
- Points redemption validity
- Payment mode availability

If any validation fails:

- Show clear message
- Stop further processing

6.5.8 Order Details

User Story 1: View Complete Order Summary

As a user, I want to view a detailed summary of my order, so that I can review all items and charges associated with the purchase.

Acceptance Criteria

- Order Details screen displays:
    - Product list with thumbnails
    - Product name, variant, price, and quantity
    - Billing address
    - Shipping address
    - Payment method (Minimum Payment / Full Payment)
    - Price breakdown:

        - Subtotal
        - Taxes
        - Shipping charges
        - Discounts (Coupons/Points)
        - Final paid amount
- All information is fetched from backend in real-time.
- If some data fails to load, system shows fallback message:
  "Unable to load order details. Please try again."

User Story 2: Track Delivery Status

As a user, I want to track the delivery status of my order, so that I know the current stage of my shipment.

Acceptance Criteria

- Order progress bar displayed in the format:
  Placed → Confirmed → Packed → Out for Delivery → Delivered
- Status updates automatically based on warehouse/driver updates.
- If any stage is delayed, show the latest timestamp.
- If order is canceled, show **"Order Cancelled"** instead of progress flow.

User Story 3: Cancel Order (Pre-shipment)

As a user, I want to cancel my order before it is shipped, so that I can stop the purchase if needed.

Acceptance Criteria

- "Cancel Order" button visible only when status is:

    - Placed
    - Confirmed
    - Not yet packed/shipped
- On tap:
    - Show confirmation popup:
      “Are you sure you want to cancel this order?”
- After cancellation:
    - Order status updates to **Cancelled**
    - Refund logic applied:
        - If full payment → refund initiated
        - If minimum payment → refund of minimum amount
    - App displays success message:
      “Your order has been cancelled.”

User Story 4: Download Invoice

As a user, I want to download my invoice from the order details screen, so that I can keep a record of my transaction.

Acceptance Criteria

- “Download Invoice” button visible for:
    - Completed orders
    - Delivered orders
- Tapping it downloads a **PDF invoice**.
- Invoice includes:
    - Order ID
    - Customer name & address
    - Product details
    - Prices & taxes
    - Payment method

    - GST details (if applicable)
- If invoice generation fails:
    - Show: **“Unable to download invoice. Please try again.”**

User Story 5: View Items in Order

As a user, I want to view all items included in my order, so that I can verify what I purchased.

Acceptance Criteria

- Each item card in order summary includes:
    - Thumbnail image
    - Product name
    - Pack size / variant
    - Quantity
    - Price
- Items appear in the order in which user added them.
- If product was later discontinued, order still shows stored snapshot data.

6.5.9 Order List – User Stories

User Story 1: View Order History (LIFO Order)

As a user, I want to view all my past orders in a list, so that I can quickly access and review my previous purchases.

Acceptance Criteria

- Order list displays orders in **reverse chronological (latest-first) order**.

- Each order card shows:
    - Product thumbnail (primary item image)
    - Product name (or “Multiple Items” if multiple SKUs)
    - Total order amount
    - Order date
    - Order status (Placed / Confirmed / Delivered / Cancelled)
- Orders are fetched from backend with pagination or infinite scroll.
- If no orders exist:
    - Show empty state:
      “You have no past orders yet.”

User Story 2: View Order Details from Order List

As a user, I want to tap any past order and open its full details, so that I can review item breakdown, invoices, and tracking.

Acceptance Criteria

- Tapping an order redirects to **Order Details**
- Data passed correctly to details screen (order ID, product list, addresses, charges).
- Navigation back returns to Order List maintaining scroll state.

User Story 3: Filter Orders by Time Range

As a user, I want to filter my past orders by time period, so that I can easily find older or recent orders.

Acceptance Criteria

- Filters available:
  - **Last 3 months**
  - **Last 1 year**
  - **All**
- Default filter: **All**
- Applying a filter updates the list instantly.
- If no orders match the selected filter:
  - Show: **“No orders found for this period.”**

6.5.10 Notification Management – User Stories

User Story 1: Receive Order Status Notifications

As a user, I want to receive notifications for important order updates, so that I can stay informed about my order’s progress in real time.

Acceptance Criteria

- System sends push notifications for the following events:
  - Order Placed
  - Order Confirmed
  - Order Shipped
  - Out for Delivery
  - Delivery Attempted
  - Order Delivered
  - Order Cancelled by Customer
  - Order Cancelled by Seller

    - RTO (Return to Origin)
- Notifications include:
    - Order ID
    - Status update
    - Short action message
    - Timestamp
- Tapping a notification opens Order Details Screen.
- Notifications trigger instantly when backend updates status.

6.5.14 Invoice Generation – User Stories

User Story 1: View & Download Order Invoice

As a user, I want to view and download the invoice for my completed or delivered orders, so that I can keep a record for my billing or claims.

Acceptance Criteria

- Invoice becomes available only when:
    - Order status = **Delivered**
- User can access invoice from:
    - **Order Details screen**
    - **Order List → Specific Order**
- Invoice contains:
    - Order ID
    - Order date
    - Customer details
    - Delivery address
    - Item-wise breakdown
    - Taxes, discounts, shipping charges

    - Final payable amount
- User can:
    - View invoice PDF
    - Download invoice PDF
- If invoice is not yet available:
    - Show message: **“Invoice will be available after delivery.”**

User Story 2: Generate & View Service Invoice (When Order is Rejected at Delivery)

As a user, I want the app to generate a service invoice when I reject an order upon delivery, so that I can understand any service or security charges applied**.**

Acceptance Criteria

- Service invoice is generated when:
    - User rejects / denies order at doorstep
    - OR delivery failure is due to customer unavailability
- Invoice includes:
    - Order ID
    - Reason for service invoice
    - Service charges or security charges
    - Date & time of failed delivery
- User can view and download this invoice from:
    - **Order Details screen**
- If no service charges apply:
    - Show: **“No service invoice applicable.”**

User Story 3: Unified Invoice Access

As a user, I want a unified experience for accessing any type of invoice, so that I don't get confused between order and service invoices.

Acceptance Criteria

- Both invoice types appear under the same **"Invoice"** section inside the Order Details.
- System automatically shows the correct invoice type based on order status:
  - Delivered → **Order Invoice**
  - Rejected/Denied → **Service Invoice**

6.5.15 Profile & History – User Stories

User Story 1: Update Profile Details

As a user, I want to update my profile information, so that my account stays accurate and up to date.

Acceptance Criteria

- User can edit:
  - Name
  - Email address
  - Mobile number (with OTP verification if changed)
  - Profile photo (optional)
  - Address
- Updated information is saved instantly.
- Validation ensures:
  - Correct email format
  - Mobile number format

- If update is successful → show confirmation toast.
- If update fails → show meaningful error.

User Story 2: Manage Delivery & Billing Addresses

As a user, I want to add, edit, or remove delivery and billing addresses, so that I can choose the right address during checkout.

Acceptance Criteria

- User can:
  - Add new address
  - Edit existing address
  - Delete an address
- Mandatory address fields:
  - Address Name (e.g. Home/Office)
  - Mobile number
  - Full address
  - Pincode
  - City & State
- User can set:
  - Default delivery address
  - Default billing address (can be same as delivery)
- Changes reflect immediately in checkout.

User Story 3: Access Support Section

As a user, I want quick access to Support, so that I can raise complaints or get help when needed.

Acceptance Criteria

- Support section includes:
  - Form
  - FAQs (optional)
- User can track ticket status:
  - Open → In Progress → Resolved → Closed
- Support opens inside profile menu.

User Story 5: Access My Points

As a user, I want to access my reward points directly from my profile, so that I can track and redeem them easily.

Acceptance Criteria

- “My Points” available inside Profile.
- Displays:
  - Total Earned Points
  - Referral earnings
  - Order-based earnings
  - Redeemable balance
- Redirects to full Points screen (referral/rewards module).

User Story 6: Access Referral Program

As a user, I want direct access to the referral program from my profile, so that I can quickly invite others and earn points.

Acceptance Criteria

- “Referral” option listed inside Profile.

- Navigates to:
    - Referral summary
    - Past referral rewards list

6.5.16 Customer Support – User Stories

User Story 1: Submit a Support Query

As a user, I want to submit my complaint or query through an in-app support form, so that I can get help when I face an issue.

Acceptance Criteria

- Support form contains the following fields:
    - Name (auto-filled if logged in)
    - Phone Number (auto-filled)
    - Email (auto-filled if available)
    - Query description (mandatory)
- Form validation includes:
    - Mandatory query field
    - Valid email & phone number format
- On pressing **Submit Query**:
    - Query is sent to backend for logging.
    - User sees a success message: **"Your query has been submitted. Our team will contact you shortly."**
- If submission fails → show error toast with retry option.

6.5.18 Wishlist

User Story 1: Add Product to Wishlist

As a user, I want to add a product to my wishlist, so that I can save items for future purchase.

Acceptance Criteria

- A wishlist icon is visible on:
  - Product Detail Page (PDP)
- Tapping the heart icon:
  - Adds the product to the wishlist.
  - Icon changes to filled state.
  - Show a small confirmation toast: **“Added to Wishlist”**.

User Story 2: Remove Product from Wishlist

As a user, I want to remove a product from my wishlist, so that I can manage items I no longer plan to buy.

Acceptance Criteria

- Tapping the heart icon again removes the item.
- After removal:
  - Show toast: **“Removed from Wishlist”**.
- Wishlist updates instantly.

User Story 3: View Wishlist Items

As a user, I want to view all items I have saved in my Wishlist, so that I can decide which items to purchase later.

Acceptance Criteria

- Wishlist page shows:
  - Product image
  - Name
  - Price
  - Pack size/variant (if applicable)
  - Add to Cart button
- If wishlist is empty:
  - Show empty state message: **"Your wishlist is empty."**

User Story 4: Add Wishlist Product to Cart

As a user, I want to add a wishlist product directly to my cart, so that I can place an order quickly.

Acceptance Criteria

- Each wishlist item displays an **Add to Cart** button.
- When tapped:
  - Product is added to cart.
  - Show toast: **"Added to Cart"**.
- Quantity selector opens if product has multiple pack sizes.
- After adding to cart:
  - Item remains in Wishlist unless manually removed.

6.5.19 FAQ Module – User Stories

User Story 1: View Categorized FAQs

As a user, I want to browse FAQs by category, so that I can quickly find answers related to my specific issue.

Acceptance Criteria

- FAQ screen displays a list of categories (e.g., Orders, Payments, Delivery, Returns, Account, App Usage).
- Tapping a category loads all FAQs under that topic.
- Category sections are scrollable and responsive.
- If a category has no FAQs:
    - Show: **“No FAQs available in this category.”**

User Story 2: Search FAQs

As a user, I want to search FAQs using keywords, so that I can instantly find answers without scrolling through all categories.

Acceptance Criteria

- A search bar is visible at the top of the FAQ screen.
- As the user types:
    - Search results update in real-time.
- Search matches:
    - Question text
    - Answer text
    - Keywords/tags
- If no results found:
    - Show: **“No matching FAQs found.”**

User Story 3: Expand and View FAQ Answers

As a user, I want to expand any FAQ question to read its answer, so that I can easily understand the solution without navigating to another screen.

Acceptance Criteria

- Each FAQ appears as a collapsible card.
- Tapping the question:
  - Expands the card to reveal the full answer.
- Tapping again collapses it.
- Only one or multiple FAQs can be expanded at a time.
- Long answers support scrolling inside the expanded card if needed.

User Story 4: Always-Up-to-Date FAQs

As a user, I want to see updated FA Qs automatically, so that I always receive accurate and latest information.

Acceptance Criteria

- FAQ list is fetched from the backend on screen load.
- Admin updates reflect instantly without app update.
- App caches FAQ content for offline fallback.
- If backend is unreachable:
  - Show last saved FAQs with a retry option.
  - Message: **“Showing last updated FAQs.”**

6.5.20 Address Management — User Stories

User Story 1: View Saved Addresses

As a user, I want to view all my saved delivery and billing addresses, so that I can quickly select or update them during checkout.

Acceptance Criteria

- A dedicated **Manage Addresses** screen lists all saved addresses.
- Each address card displays:
  - Full name
  - Complete address
  - Phone number
  - Address type (Home/Office/Other)
- If no address is saved:
  - Show an empty state: **"No saved addresses. Add your first address."**

User Story 2: Add a New Address

As a user, I want to add a new shipping or billing address, so that I can store multiple delivery locations.

Acceptance Criteria

- User can tap **"Add New Address"** from Manage Addresses or during checkout.
- Required fields:
  - Full name
  - Mobile number
  - Address line
  - City

    - State
    - Pincode
    - Address type (Home/Office/Other)
- System validates:
    - Phone number format
    - Pincode (6 digits)
    - Mandatory fields
- Address gets saved immediately after submission.
- Newly added address appears at the top of the address list.

User Story 3: Edit an Existing Address

As a user, I want to edit a saved address, so that I can update outdated details without creating a new entry.

Acceptance Criteria

- User can open any saved address and choose **Edit**.
- All fields become editable.
- Validation applies for pincode, phone number, and mandatory fields.
- Updated address replaces the old entry.
- A success toast appears: **"Address updated successfully."**

User Story 4: Delete an Address

As a user, I want to delete an old or unused address, so that I can keep my address list clean and relevant.

Acceptance Criteria

- User can tap **Delete** on any saved address.

- System shows a confirmation pop-up:
    - **“Are you sure you want to delete this address?”**
- Upon confirmation:
    - Address is permanently removed.
- If the deleted address was selected for checkout:
    - User must select or add a new address.

User Story 6: Default Address Handling

As a user, I want the app to remember my default address, so that I do not need to select it every time I place an order.

Acceptance Criteria

- First added address becomes default automatically.
- User can mark any address as **Default**.
- Default address is pre-selected in checkout.
- Default badge is shown on the address card.

6.5.21 View Policy Pages

As a user, I want to view important policy pages (Terms & Conditions, Privacy Policy, Refund & Cancellation Policy), so that I can understand the rules, rights, and responsibilities before using the app or placing an order.

Acceptance Criteria

- Policy pages are accessible from the **Profile** section.
- Available pages include:
    - Terms & Conditions

    - Privacy Policy
    - Refund & Cancellation Policy
- Policies open in a dedicated in-app web view or scrollable page.
- Content is fetched dynamically from backend (updatable by admin).
- User can scroll through full text easily.
- Back navigation returns user to previous screen.
- If content is unavailable:
    - Show error message: **“Policy content unavailable. Please try again later.”**
